

# SUPER GERMIPHENE

## Concentrated Multi-use Disinfectant/Cleaner

An effective solution that does it all in one labour-saving step.

Super Germiphene is a new generation quaternary ammonium solution that cleans, deodorizes and disinfects in one step. It may be used as an instrument pre-soak and general disinfectant to eliminate blood, saliva and other residue, deposits and soils on hard surfaces.

Super Germiphene is an effective disinfectant against a broad range of bacteria, fungi and viruses. Super Germiphene is proven to kill 53 different organisms including HIV and Herpes in hard water (up to 400ppm) and in the presence of organic soil (5% blood serum).

This multi-use solution is very economical. Two liters of concentrate makes 128 liters of use solution.

- Biodegradable
- Convenient tip'n measure bottle
- Non-corrosive/Non-rusting
- Excellent compatibility with all instruments
- Dual action deodorant – removes odours, then kills odour-causing organisms
- Remarkable cleaning power

***Stronger than the competition!***

# PRODUCT PROFILE

## SUPER GERMIPHENE

DIN 02243241

**Product:** SUPER GERMIPHENE is a concentrated, multi-use disinfectant solution that cleans, deodorizes and disinfects in one labour-saving step.

**Description:** A fourth generation quaternary ammonium solution containing 2 active ingredients: didecyl dimethyl ammonium chloride 2.31% and n-alkyl dimethyl benzyl ammonium chloride 1.54%.

**Function:** SUPER GERMIPHENE solution cleans, deodorizes and disinfects in one step. The broad-spectrum killing action is effective against a wide range of pathogenic micro-organisms.

**Packaging:** 454 mL Bonus Pak (4 x 454 ml) 2 L Tip 'n measure  
(buy 3 units, receive 1 unit free) 4 L

| Features                                | Benefits                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Broad Spectrum Germicidal Action</b> | SUPER GERMIPHENE is an effective disinfectant against a broad range of pathogenic and disease-causing bacteria. SUPER GERMIPHENE kills many gram positive and gram negative bacteria found on hard surfaces. Tested by the AOAC use-dilution method, SUPER GERMIPHENE is effective against: <i>Pseudomonas aeruginosa</i> , <i>E. Coli</i> , <i>Staphylococcus aureus</i> , <i>Influenza type A</i> , <i>Salmonella typhi</i> , <i>Herpes simplex type I &amp; type II</i> , <i>Salmonella typhimurium</i> , <i>Klebsiella pneumoniae</i> , etc. |
| <b>Inactivates Viruses</b>              | SUPER GERMIPHENE inactivates <i>Influenza A</i> (causes grippe or flu), <i>Herpes simplex type I</i> (causes fever blisters and cold sores), <i>Adenovirus Type 4</i> (causes acute respiratory diseases), <i>Vaccinia</i> (pox virus used for vaccination against smallpox) on all environmental surfaces. SUPER GERMIPHENE kills <i>Trichophyton mentagrophytes</i> , the stubborn athlete's foot fungus.                                                                                                                                      |
| <b>Dual Action Deodorant</b>            | First, SUPER GERMIPHENE solution removes odours by its deep cleaning action. Then SUPER GERMIPHENE solution kills the organisms that cause odours, thus acting as a genuine deodorant. SUPER GERMIPHENE solution removes the strong odours of mould, vomit, feces, smoke, and cooking odours. This dual action is excellent for hospitals, clinics and laboratories.                                                                                                                                                                             |
| <b>Economical</b>                       | SUPER GERMIPHENE solution reduces costs because it can be used for a variety of cleaning tasks                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Wetting Properties</b>               | SUPER GERMIPHENE is a surface-active agent which reduces surface tension and interfacial tension of all aqueous solutions. Consequently, it reaches and destroys micro-organisms in minute cracks and crevices.                                                                                                                                                                                                                                                                                                                                  |
| <b>Stability</b>                        | Shelf life is 3 years. Being non-volatile, it does not lose potency in solutions of either hot or cold water.                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Non-Corrosive &amp; Non-Rusting</b>  | When diluted according to directions, most types of instruments may be immersed in the "use" solution without fear of rusting.                                                                                                                                                                                                                                                                                                                                                                                                                   |
